8. *Important days to be observe*

Quotes of Pope Francis

The world tells us to seek success, power and money; God tells us to seek humility, service and love.

To be saints is not a privilege for a few, but a vocation for everyone.

Listen to Jesus and follow him. That's the message of the Transfiguration.

Dear young people, do not bury your talents, the gifts that God has given you! Do not be afraid to dream of great things!

To celebrate the sacrament of reconciliation means to be wrapped in a warm embrace.

Human dignity is the same for all human beings: when I trample on the dignity of another, I am trampling on my own.

Do not be afraid of what God asks of you! It is worth saying 'yes' to God. In him we find joy.

Quotes of *Father Founder*

“You will face many defeats in life, but never let yourself be defeated.”

“The greatest glory in living lies in never falling, but in rising every time we fall”

“All our dreams can come true, if we have the courage to pursue them”

“The world as we have created it is a process of our thinking. ...”

“No one is perfect - that's why pencils have erasers.”

Provincial Message

How thoughts can change your life

“Keep your face always towards the sunshine – and shadows will fall behind you.”

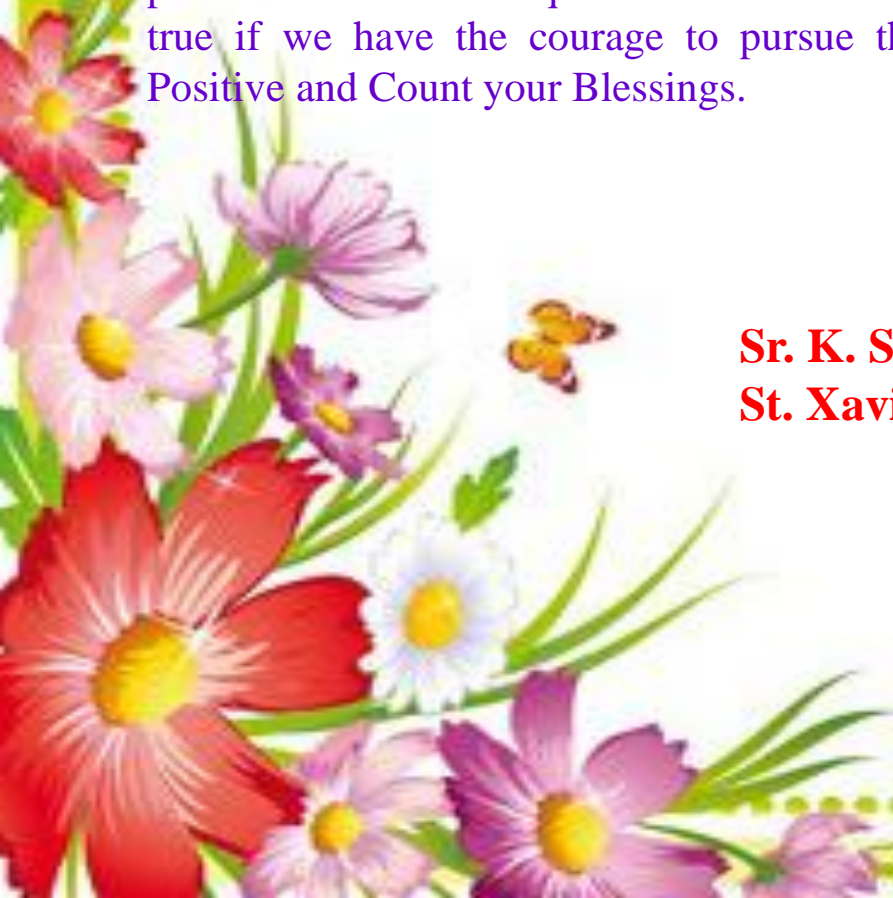

The power of thinking positively is remarkable. In fact, the idea that your mind can change your world almost seems too good to be true. If you start thinking positively then automatically positive vibes start attracting you. Before I get into that, I would ask you a question: what do you think the most successful people think all day long? Actually, the answer is that there is a positive attitude inside that person. That person always thinks about the positive things and most importantly that person tries to find the positive in everything. When you think and talk about what you want each day then gradually you start attracting that. When you think about something that makes you happy, your brain actually releases Endorphins - the happiness hormone which gives you a generalized feeling of well-being and as a result, you develop a positive attitude.

Now I will just give a live example: I had one friend and she used to be happy at all times like I never saw her upset though her family conditions were not that great. And then if I talk about myself, I used to crib for things which I desire but cannot get. Then once my mom told me to think about my friend. She didn't have new clothes to wear, Toys to play with etc. But then despite

all that she was very happy. So, I learned a lesson to just stop demanding unnecessary things. That very day I learnt about “gratitude”. Gratitude is when you are thankful for each and everything in your life. If you are looking for something good or beneficial in a person or situation, you will always find it. Rather than getting upset and blaming someone else for what has happened.

Resolve today to learn how to develop positive thinking and a positive attitude towards yourself, the people around you and your life. The best way to train your mind to think positive is when a negative event occurs, remember that it’s your response that truly determines the outcome. Always look for the positive response or optimistic lesson when such events take place. Try to replace your negative thoughts with positive affirmations. You can also gain positivity by having positive people around you and by reading positive/ motivational quotes or books!! All our dreams can come true if we have the courage to pursue them. To conclude, Be Positive and Count your Blessings.

Sr. K. Sandiya
